PROFESSIONAL SUMMARY

Angular developer with 3 years building and migrating enterprise applications in the insurance domain. Delivered end-to-end UI development, backend logic, and test automation for a Salesforce-to-Angular migration, achieving unit test coverage across 12+ components. Designed Gen AI Copilot workflows that automated agile lifecycle management and reduced manual effort on issue and story creation. Certified in Terraform, MongoDB, GitHub Copilot, and Claude AI Architecture. Integrates AI-assisted development tools — MCP servers, Davis Copilot, Claude AI — into daily delivery workflows.

TECHNICAL SKILLS

Languages & Frameworks: Angular, TypeScript, Python, Java, C

Testing: Playwright, Cucumber, Angular Unit Testing

Cloud & Infrastructure: AWS, Terraform (HashiCorp Certified), MongoDB, GitLab CI/CD

Observability & DevOps: Dynatrace, DQL, Davis Copilot, Snyk

AI & Automation: Claude AI, GitHub Copilot, MCP (Model Context Protocol), Prompt Engineering, Gen AI Copilot

Platforms & Tools: Salesforce, Angular CLI, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer | **Accenture** | Aug 2023 – Present | Chennai, India

MOC Application — UI & Backend Development

- Built Angular UI for Adoption, Availability, Production-Incidents, and Reference pages, including a file upload component with end-to-end backend logic
- Resolved AWS security vulnerabilities in production and explored backend pipeline queues to identify performance bottlenecks

MORT — Dynatrace Observability

- Analyzed monitoring data across Playground, Test, and Production environments using Dynatrace DQL with Davis Copilot
- Designed and combined MAX program monitoring dashboard tiles to meet stakeholder reporting requirements

Gen AI Copilot — AI-Powered Workflow Automation

- Designed Gen AI Copilot capabilities using prompt-driven workflows, enabling automated storyboard creation from documents, meetings, and files
- Automated agile lifecycle management through AI prompts: created GitLab issues and user stories with full attribute sets — status, progress tracking, assignee, and weight — cutting manual effort significantly
- Built standardized templates for features and user stories; created example prompts to guide user adoption; demonstrated Copilot capabilities directly to clients

3 Applications — Salesforce to Angular Migration

- Migrated the full Recorded Statement, Financials and Auto QFC application from Salesforce to Angular, including API (12-endpoint) response verification using co-pilot within 2 months.

- Wrote Angular unit tests for 12+ components, consistently hitting 95%+ code coverage
- Wrote Playwright test cases using Cucumber BDD and e2e tests: 22 happy-path scenarios, 6 error scenarios, accessibility tests meeting WCAG standards, and keyboard navigation coverage.

AI-Assisted Development — Daily Integration

- Integrated MCP servers (State Farm GitLab, Snyk) for faster vulnerability identification and resolution across the SDLC
- Applied Claude AI agent for deeper code analysis, problem-solving, and test automation improvements
- Qualified as Multi-dimensional Skill Champion: Angular P3+, AWS P3+, Python P3, Personal Insurance P3+, Individual Life Insurance P3+

CERTIFICATIONS

- **HashiCorp Certified: Terraform Associate (003)** — Jul 2025
- **MongoDB Certified SI Associate** — Aug 2025
- **GitHub Copilot** — Microsoft — Aug 2025
- **Claude Certified Architect: Foundations** — Anthropic — Apr 2026
- **Reinvention With Agentic AI Learning Program** — Accenture — Mar 2026
- **Green Software for Practitioners (LFC131)** — The Linux Foundation — Nov 2023

EDUCATION

Bachelor of Engineering, Computer Science Engineering

Saveetha Engineering College, Chennai | 2019 – 2023 | CGPA: 8.68
